

Painting of St. John the Evangelist

The restoration of the painting (circa 1896) of St. John the Evangelist by Cesare Portia on the southeast corner of the nave ceiling was completed in December 2024. The restoration work included removal of surface grime and old varnish, application of isolating varnish, filling and inpainting of paint losses and application of finishing varnish to protect the painting for future generations.

Our thanks to Catherine Rogers and Craig Crawford for their wonderful restoration work.
